

Nava Shpylrain

Authorized to work in the EU

Design-oriented Frontend Developer with a multidisciplinary background in design, branding, and art direction. Focused on bridging design and clean, performant frontend code, with hands-on experience in [HTML](#), [CSS](#), and [JavaScript](#). Experienced in building responsive, user-focused UI and translating design language into practical frontend implementation.

FRONT-END DEVELOPMENT EXPERIENCE

UI Developer Designer | Front-End Contributor

With Power, San Francisco, CA | 2022

Worked remotely on a clinical trials platform, contributing to the front-end development and UI/UX.

- | Fixed HTML semantics and adjusted layout of the site footer, with changes remaining in production.
- | Implemented design updates in Sass/TailwindCSS from Figma mockups.
- | Contributed to a custom UI component library in [Ladle.dev](#).
- | Developed a gradient library from designer mockups and optimized a large texture file into a Data URI, both still in use site-wide.
- | Ensured cross-browser compatibility and responsive design for mobile, tablet, and desktop.
- | Collaborated daily with the lead designer and developer team, using GitHub and Vercel for continuous updates and deployment.

PERSONAL PROJECT

TCRB – Frontend UI Project

www.tcrb.netlify.app | 2026

TECH: ReactJS, Vite, TailwindCSS, JavaScript

A frontend-focused web application for tracking potential forecasts of T Coronae Borealis, a rare astronomical phenomenon, based on publicly available online sources.

- > Designed and developed a mobile-first frontend interface based on a design language.
- > Built a user flow handling different entry states, including anonymous access and location based consent.
- > Implemented conditional UI states for scenarios with available forecast data versus no precise forecast available.
- > Structured article presentation logic to prioritize trusted sources, followed by additional sources ordered by relevance and recency.
- > Integrated external search data using Serper and Brave web sources, filtering results based on a predefined list of trusted publishers.
- > Used AI tools to assist in backend-related logic and data preparation, while focusing frontend work on UI structure and data presentation.
- > Implemented the UI using React with Vite and TailwindCSS for styling and layout control.

Freelance Art Designer

Independent, Tel Aviv | 2015-Present

- | Developed unique brand languages and concepts tailored to client needs.
- | Focused on creating intuitive user experiences and effective user interfaces.

Private Chef Website – Client Project

<https://chef-gil.com> | 2025

TECH: HTML, CSS, JAVASCRIPT, JSON

Designed and developed a client facing website for a private chef, based on real business needs and iterative client feedback.

- > Built a responsive, multipage site with an app-inspired ordering flow, the interface with familiar food ordering user patterns.
- > Implemented semantic HTML and on-page SEO practices, including meta tags, Open Graph data, canonical URLs, and structured content hierarchy.
- > Integrated structured data (JSON-LD) for business and personal entities as part of on page SEO implementation.
- > Developed a JSON-driven menu system across three core pages, enabling menu selection and category filtering (e.g. salads, desserts).
- > Applied basic accessibility practices, including descriptive alt text, ARIA attributes, keyboard-friendly controls, and clear color contrast.

Art Director/Chief Design Director

Dvir-Marketing Consulting Company, Tel Aviv | 2016-2019

- | Led creative direction, | visual identity, and branding for diverse clients.
- | Moderated marketing strategy panels to define brand values and identity.
- | Created campaign concepts and visual guidelines from concept to execution.

In-house Designer

Mantver Event Production Company, Tel Aviv | 2017-2018

- | Developed brand identities and visual assets for large-scale events.
- | Produced marketing elements across print, digital, and video platforms.
- | Collaborated with production teams on stage, interior, and event branding.

KEY CLIENTS: Government ministries, municipalities, major banks, mobile companies, airline companies.

Director of Graphic Department

Cnaan printing. Rishon Lezion | 2015

- | Managed a team of 4 graphic designers, streamlining workflows.
- | Bridged communication between marketing, sales, and production teams.
