Nava Shpylrain

Authorized to work in the EU

Design-oriented Frontend Developer with multidisciplinary background in design, branding, and art direction.

Focused on bridging design and clean, performant frontend code, with hands-on experience in [HTML](#), [CSS](#), [JavaScript](#) and [React](#).

Experienced in building responsive, user-focused UI and translating design language into scalable, component-based interfaces.

FRONT-END DEVELOPMENT EXPERIENCE

UI Developer Designer | Frontend Developer (Contract, Remote)

[With Power](#), San Francisco, CA | 2022

TECH: React (TSX), JavaScript, TailwindCSS, Sass, Git, Ladle.dev

Worked remotely on a clinical trials platform, contributing to a production React (TSX) codebase.

- | Contributed to a production React codebase, implementing UI components and improvements that remain live on the platform.
- | Translated Figma designs into responsive, production-ready UI, adapting layouts and components across screen sizes and filling gaps where specifications were incomplete.
- | Implemented and refined UI components with props-based variations, supporting multiple sizes, states (hover, focus, active, disabled), and responsive behavior.
- | Contributed to a design system initiative using Ladle.dev, developing UI components and aligning implementation with design consistency.
- | Developed and implemented a gradient system (60+ variations), translating complex design specifications into reusable Sass/Tailwind styles integrated into the UI system.
- | Ensured cross-browser compatibility (Chrome, Safari, Firefox, Brave, Opera, Internet Explorer), testing across devices and resolving layout inconsistencies.
- | Improved HTML semantics and refined layout structures, including updates to existing UI sections such as the site footer.
- | Worked within a GitHub-based workflow, contributing PRs that were reviewed, approved, and merged into the production codebase.
- | Collaborated with the founding designer on UX and product decisions, contributing to user flow improvements and interaction design.

TCRB – Design Engineer / Frontend Engineer

www.tcrb.netlify.app | 2026

TECH: JavaScript, ReactJS, Vite, TailwindCSS, HTML5, CSS3, REST APIs, JSON

A web application that aggregates and interprets astronomical data to provide a clear forecast for the T Coronae Borealis nova event.

- | Led end-to-end development of a product that aggregates fragmented astronomical data and translates uncertainty into clear user-facing forecasts.
- | Designed a state-driven UI system and defined information hierarchy, prioritizing trusted sources and structuring results by reliability and recency.
- | Integrated external data sources (Brave, Serper) with AI-assisted processing (Grok) to filter and transform data into structured frontend outputs.
- | Developed a responsive, mobile-first interface using React and TailwindCSS, including conditional rendering, location-based UX flows, and component-based architecture.
- | Built a public design system in Figma, including reusable UI components, typography, and color tokens, ensuring consistency between design and frontend implementation.

Architecture
Interior Design
Ramat Yossel
High School, Bat-Yam

Freelance Art Designer

Independent, Tel Aviv | 2015-Present

- | Developed unique brand languages and concepts tailored to client needs.
- | Focused on creating intuitive user experiences and effective user interfaces.

Private Chef Website – Client Project

<https://chef-gil.com> | 2025

TECH: HTML5, CSS3, JAVASCRIPT, JSON, SEO

Designed and developed a client-facing website for a private chef, translating business positioning and menu structure into a clear and accessible digital experience.

- | Defined the UX and visual direction based on client constraints, creating an approachable design language that balances premium with accessibility.
- | Designed an app-inspired ordering experience, leveraging familiar food delivery patterns to increase usability and user engagement.
- | Developed a dynamic, JSON-driven menu system, structuring content as reusable data and enabling scalable rendering across multiple pages.
- | Adapted the system and UI to changing business requirements, restructuring menu logic and content flow during development.
- | Implemented semantic HTML and on-page SEO, including meta tags, Open Graph, canonical URLs, and structured data (JSON-LD), contributing to strong search visibility, ranking first for branded search queries.
- | Applied basic accessibility practices (ARIA attributes, semantic structure, keyboard friendly interactions) and built a fully responsive interface.

Art Director/Chief Design Director

Dvir-Marketing Consulting Company, Tel Aviv | 2016-2019

- | Led creative direction, | visual identity, and branding for diverse clients.
- | Moderated marketing strategy panels to define brand values and identity.
- | Created campaign concepts and visual guidelines from concept to execution.

In-house Designer

Mantver Event Production Company, Tel Aviv | 2017-2018

- | Developed brand identities and visual assets for large-scale events.
- | Produced marketing elements across print, digital, and video platforms.
- | Collaborated with production teams on stage, interior, and event branding.

KEY CLIENTS: Government ministries, municipalities, major banks, mobile companies, airline companies.

Director of Graphic Department

Cnaan printing. Rishon Lezion | 2015

- | Managed a team of 4 graphic designers, streamlining workflows.
- | Bridged communication between marketing, sales, and production teams.
